Teachers wanted!

- Are you a middle or high school teacher in an inner city or tribal community in Wisconsin?
- Are you interested in learning about streams and water quality?
- Are you interested and willing to participate with your students in a stream monitoring program?
- Are you interested in sharing your thoughts on stream monitoring with teachers and community leaders in other states?
- Do you have web access?

If your answers to the questions above are yes, then you might be interested in becoming a participant in a unique stream monitoring program sponsored by UW-Extension, Michigan State University Extension and Ohio State University Extension.

As a participant you will receive:

- Free attendance to two hands-on water monitoring training sessions, including:
  - a single day session in WI, Aug. 12 or 13, 2010, 10 AM – 5 PM (sites TBD), and
  - a two-day session in Michigan in summer 2011 (dates TBD)
- A class set of monitoring equipment to be shared with one other teacher
- Access to webinars for learning opportunities and discussion to help you improve your understanding of streams and water quality monitoring
- An honorarium for your time spent working on the project (pending administrative approval)
- Continuing education credits (if desired). Note: Participants are responsible to pay for CEU credits

The time commitment includes attendance at the full day training in August 2010, the 2-day training in Michigan in 2011, four webinars to be scheduled for fall, winter and spring 2010-2011, and time implementing the monitoring program with your students in fall 2010 and spring 2011.

If you have an interest or want to learn more, please contact:
Kris Stepenuck
WI Volunteer Stream Monitoring Program Coordinator
kfstepenuck@wisc.edu, 608-265-3887

Space is limited to 8 teachers.
