CBSM Station ID number: _____ (please get Station Name and ID # from Chris Clayton and use one log sheet for each thermistor device)

CBSM Station Name: _____

Organization Name: _____

Team Members: _____

Thermistor Device Number: _____ **Device Type:** _____

Description of the location of this thermistor		Date Deployed:	Time Deployed:	Date Retrieved:	Time Retrieved:
☺ Dates & Times that the thermistor location and operation was confirmed: Please check monthly!					
Date:					
Time:					
Comments:					
(DNR use only) Data retrieval and upload: (Save data file in Thermistor 2009 on the Central/Watershed shared drive)	<i>Transferred raw data from thermistor to data file: (download from device to file)</i>	<i>Delete out of stream temperature data from the file: (edit raw data file)</i>	<i>Upload temperature data to SWIMS. (upload continuous data)</i>	<i>Confirm data upload and add Type to "Sample Field ID" (add "TIDBIT" to SWIMS record)</i>	<i>Put in completed folder. (move data file and place this form in completed folder)</i>
	Person:				
	Date:				

☺ If thermistor is not located any given month, be sure to continue searching for thermistor in subsequent months. It may be possible to locate it at a later time when the water recedes or sediment is washed away.

For your continuous temperature data to be used in SWIMS, we must receive the thermistor (or its raw data file) AND this log sheet.

Please return thermistor with this log sheet to: Chris Clayton, 101 S. Webster St. WT/3, PO Box 7921, Madison, WI 53707, (608)266-9260
